

design: the **sign** **of God**

Adrenalin *by Dennis Lange*

Adrenalin is necessary for the fight or flight response to danger. We might meet an intruder in the house and fight in self-protection. We might meet a bear in the woods and take flight. When our bodies are not producing adrenalin, a loud explosion might take place in the next room and we would feel no alarm whatsoever. We might very slowly turn our heads and say, "Whaaaaaaaaaat?" If a fire resulted, we'd probably burn to death before we could react. Without adrenalin, we could not survive.

Godless evolution says there was a time when adrenalin didn't exist. However, we see that it is an impossibility that man could cope without it. Adrenalin didn't evolve. It was created by God as part of the protection of all His creatures who need it.

Gen.28:15 I am with you and will keep you wherever you go.
