

## Human Body Organs

by Dennis Lange

60,000,000,000,000 parts, working together, doing what their individual tasks are, organized into systems! Who would say that such an object occurred by accident? The adult human body, composed of 60 trillion cells was designed, planned, created and not a product of rolling dice.

*Ps.139:14 I will give thanks to Thee for I am fearfully and wonderfully made.*
